

**WHAT YOU SHOULD TRY:
All medical students**

Operations To Scrub In

Operations

- (1) Amputation
- (1) Appendectomy
- (2) Axillary dissection
- (2) Biopsy of breast & other masses & spot localization

- Broviac, Hickman, or Portacath
- (1) Chest tube insertion
- (2) Cholecystectomy
 - Laparoscopic
 - open
- (2) Colectomy

- (1) Gastrectomy
- (3) Herniorrhaphy
- (2) – Inguinal
- (1) – ventral/incisional
- (1) Lysis of adhesions for Small bowel obstruction
- (1) Mastectomy
- (1) Splenectomy
 - Stoma creation
- (1) – colostomy
- (1) – gastrostomy
- (1) – ileostomy
- (2) Thyroidectomy
- (1) Trauma laparotomy
- (1) Renal transplant
- (1) Heart transplant
- (1) Lung resection
- (1) Coronary artery bypass
- (2) Minimal access procedure (nephrectomy, splenectomy)
- (2) Carotid artery
- (1) AAA
- (1) Distal bypass

Procedures To Do

- (2) Drawing blood fr. a peripheral vein
- (1) Drawing arterial blood
- (2) Suturing skin
- (1) Tying simple knots, suturing

- (2) Central venous access

- (3) Changing dressing
 - wet-to-dry
 - open abdominal wound

- (2) Starting a peripheral IV
 - (2) Inserting an NG tube
- (2) Inserting a Foley catheter
 - in a man
 - in a woman
- (2) Jackson-Pratt drains
 - management
 - removal
- Writing notes
- (5) – admission
- (10) – daily
- (5) operative
- (5) post-operative
 - writing orders
- (5) – admission
- (5) post-operative
- (5) – staple removal
- (5) - suture removal
