

Cancer Prevention Program

The Cancer Prevention Program of NewYork-Presbyterian Cancer Centers focuses on prevention, screening, and high-risk identification services. Building on our extensive research and clinical expertise, the Cancer Centers have developed programs to help individuals reduce the risks of developing cancer. Our program addresses strategies to prevent cancer and to prevent its recurrence in cancer survivors ■

Cancer Prevention Lecture Series

The New York-Presbyterian **Cancer**

Prevention Program provides lectures for companies interested in offering their employees the latest information on cancer prevention.

Our goal is to educate your employees on the topic of cancer prevention and to help them incorporate a healthy life-style into their daily lives, and those of their families, in order to reduce the risk of developing cancer. We are pleased to be able to provide highly informative, thought-provoking lectures by some of the leading experts in the field of cancer prevention.

You may wish to have all topics presented throughout the year, select one or two topics, or perhaps make this an annual lecture series. Feel free to request a different topic that may be of interest. Each lecture lasts about 40 minutes and is followed by a question and answer session. Please call **212.472.5412** for more details.

TOPICS

- YOUR FAMILY HISTORY OF CANCER: WHAT'S YOUR RISK AND WHAT CAN YOU DO ABOUT IT?
- THE CANCER/INFECTION CONNECTION
- PHYSICAL ACTIVITY, OBESITY AND CANCER RISK
